

Cablecom has NEW WIRELESS TECHNOLOGY allowing for an easily deployable high-speed Internet service and VoIP. Our typical installation is complete within five business days, and there is no need for new wiring. Because our technology is wireless, our services are non-taxable saving your company hundreds of dollars a month. Use our service as an alternative, or use it as a back up plan when your current carrier has an outage.

- Save up to 40% on your high-speed AND phone costs
- Rapid delivery of bandwidth without external wiring
- Lower cost than other large carriers
- Controlled and fully monitored network
- Integrating security systems with BPL and VoIP
- Robust network backup and redundancy seamlessly switching between networks

Wireless High Speed Internet Corridor

Cablecom provides an outstanding rapidly deployable wireless data service using a sophisticated fixed radio frequency (RF) network. With a line of sight connection, high-speed and VoIP telephone service can be installed and working in less than five business days. Note: unlike satellite, our service is not affected by weather.

Broadband over Power Line (BPL): Cablecom offers an extraordinary data delivery service for high-speed access and low cost security systems in multi-dwelling unit buildings and large buildings that lack sufficient internal wiring. Using Broadband over Power Line (BPL) technology, a high-speed Internet signal is securely transmitted over the existing internal wiring. This technology eliminates the cost of new "CAT-5" or other data wiring and provides access to high-speed data, VoIP, and security cameras.

VoIP Telephone: Cablecom is a registered CLEC in Illinois and began offering VoIP service when the benefits to customers became obvious – cost reduction and flexibility. Cablecom customers save money on long distance, local long distance, and local calling plans. Our VoIP phones can be used on any high-speed data line. Billing is centralized and Cablecom customers receive a consolidated invoice with detail for all lines used.

About Cablecom, Inc.

Cablecom is a local company with over 30 years of Telecommunications experience. We understand the services our customers need and provide new cost-savings solutions. Our goal and commitment is providing you with new technology at affordable prices.
